

The latest news on what's powering our neighborhoods

Save energy, save money, save the planet

Wild Horse Wind and Solar Facility

PSE is committed to a clean energy future, and our record proves it. The three large wind farms we built and operate generate enough power to serve nearly a quarter-million homes and businesses. Since 1889, we've been turning the water at Snoqualmie Falls into electricity and recently revamped two of our hydro plants. And our energy efficiency programs helped us save enough electricity to power 30,000 homes last year. Learn more, and see how you can participate online.

energize**EASTSIDE**

Investing in the future

The Eastside is growing faster than any other region in Washington. That's great news for our community, but it's also creating strain on our electric system. In 2014, customers and other stakeholders will help us evaluate locations for the 230 kilovolt power lines between Renton and Redmond. Construction will begin in 2017.

You have our guarantee

We are committed to keeping scheduled appointments and to restoring power outages as soon as we can. If we don't keep an appointment or if electric service is out for 120 consecutive hours or longer, subject to certain conditions, we'll credit your account \$50.

Keep meters clear of snow and ice

Snow and ice can damage your natural gas meter and leave you in the cold! Use a broom to gently remove them, and don't let snowmelt refreeze on the meter.

2014 energy efficient rebate programs

Resolve to make your home more energy efficient this year. For a better understanding of your home's energy use get a free **HomePrint Assessment**, now available for both electric and natural gas customers. You'll find money-saving rebates on high efficiency lighting, appliances, home and water heating equipment, windows and more!
