

## 2023 Renewable Energy Report Card

From the renewable energy generated at Puget Sound Energy-owned wind and hydro power facilities as well as what is purchased from independent power producers, we are on track to meet and exceed the required 15 percent renewable energy target by year-end 2023. The target is based on the average amount of electricity PSE customers used the prior two years. The costs associated with the generated renewable energy and renewable energy credits were \$43.35 million per year at the time of acquisition and \$32.96 million for the qualifying renewable resource mix anticipated to be used in 2023.
