

The latest news on what's powering our neighborhoods

## Take easy steps now to save energy later

PSE customer Brianna Werre – King County

For a limited time this fall, get an extra 10 percent off when you upgrade your heating equipment or windows!

Cloudy skies, shorter days, and wet — typical Northwest weather. While you can't improve what's outside, you can make what's inside more comfortable. PSE offers rebates up to \$7,000 off insulation, duct sealing, efficient windows, water heaters and space-heating equipment. You'll also save an additional 10 percent (up to \$1,500) this fall when you purchase and install qualifying heating equipment or windows through our Contractor Alliance Network. Hurry, though, time is limited.

## Know what's below. Call 811 — it's the law

Remember to call 811 two business days before digging in your yard. This free service will arrange to mark buried utility lines so that you don't accidentally dig into them, which could injure you and damage the utilities.

Furthermore, Washington law requires you to call. So don't take chances: pick up the phone and call 811.

## Customer-owned buried natural gas piping

PSE regularly inspects the underground natural gas pipelines in the street and to your meter to make sure they are operating properly and safely. If you own buried piping, such as piping to pools, hot tubs, natural gas barbecues or detached buildings, it is your responsibility to maintain the piping unless PSE installed and agreed to maintain it. If your piping is not maintained, it may leak or corrode. Have a licensed plumbing contractor do the inspection and any necessary repairs.

Thanks to all of our customers who came out in September to celebrate the re-developed Snoqualmie Falls Hydroelectric Project and Park.

## Adjustments to bills anticipated for October

In late August, PSE requested slight adjustments in natural gas and electric rates. If approved by the Washington Utilities and Transportation Commission, the changes are expected to take effect Oct. 1. Please visit [pse.com/rates](http://pse.com/rates) for the latest information.

## Fall back with LED light bulbs

Listen up, electric customers! LED bulbs use less energy and last 10 times as long as regular bulbs. This fall, you can save even more with limited time offers from participating retailers.
