

# Hire a pre-approved commissioning professional

The following commissioning professionals are approved to deliver all of PSE's commissioning programs. If a preferred individual or company is not represented on this list, PSE will need an application listing the provider's commissioning qualifications for preapproval. To get approval for an individual not on the list, email PSE at: **commissioning@pse.com**.

PSE customers are advised to select the provider for their project based on qualifications, especially as they relate to your particular needs, building and systems.
