The latest news on what's powering our neighborhoods

We're undergoing one of the most significant transformations in our history

For 150 years, Puget Sound Energy has fueled the growth of local communities in one of the most innovative regions in the world. We're undergoing one of the most significant transformations in our history as we strive to meet Washington state's clean energy laws, while continuing to deliver the safe, reliable and affordable energy our customers expect.

We're aggressively pursuing renewable energy resources, from large, utility-scale generation projects to energy produced locally and in partnership with the neighborhoods and communities we serve. At the same time, we're strengthening and modernizing the electric grid, and investing in technologies that can support a continuous and reliable supply of clean energy to our customers.

Create a sustainable future with renewable energy

Reduce your environmental impact and be part of a cleaner energy future. Our renewable energy programs are easy, affordable ways to reach your sustainability goals and protect the environment for future generations.

Green Power: Match your home's energy use with renewable energy like wind and solar from independent producers. Your participation supports the Green Power Solar Grant program that provides solar installations for nonprofits and local community organizations.

Community Solar: Replace the electricity you use with 100% locally generated solar power without having to install a system of your own.

Renewable Natural Gas (RNG): Replace a portion of your conventional natural gas use with gas captured at a Washington landfill.

In 2023, over 100,000 PSE customers participated in one or more of our renewable energy programs. Together, we are on an important journey to reduce our environmental impact and create a more sustainable future. Learn more about our renewable energy programs and sign up at pse.com/renewables

2023 Historic Product Content Labels

Fuel	Historic %	Historic locations
Green Power		
Wind	78%	WA, OR, ID, MT, CO, WY and BC
Solar	21%	WA, OR, ID, CO and UT
Geothermal	1%	OR
Solar Choice		
Solar	100%	WA, OR, ID, CO and UT
Community Solar		
Solar	100%	WA
Carbon Balance		
Improved Forestry Management	100%	AK, WA and BC
Renewable Natural Gas		
Landfill gas	100%	WA

Don't risk it!

Natural gas and electric utility lines could be buried where you least expect them. Hitting an underground utility could result in a big repair bill, not to mention putting you at risk of injury. Utility-owned lines are located for free.

Always contact **811** before digging to avoid service disruptions caused by damaging buried utilities.

April 2024 bill print messages

Summary page

April is Safe Digging Month

Call 811 before digging so you don't hurt yourself or damage pipes and wires. Make the call two full business days (not including the day you call) before you dig so utilities can come out and mark the buried lines for free.
