

GAS BOILER TUNE-UP REBATE APPLICATION

\$600, UP TO THE COST OF THE TUNE-UP

FOR BOILERS 300,000 BTU/HR AND LARGER WITH POWER BURNERS

STEP 1: PRE-APPROVAL NOT REQUIRED – CONTRACTOR RESPONSIBLE TO VERIFY CUSTOMER IS PSE GAS CUSTOMER

PSE Customer rebate applicant: Print, fill out and return this form with your flue gas analysis and receipt.

CUSTOMER NAME		CONTACT PERSON / TITLE		
SERVICE ADDRESS		CITY	STATE	ZIP
PHONE	FAX	E-MAIL		
PSE ACCOUNT NO. (Refer to PSE natural gas bill)		SUB-ACCOUNT NO. (if applicable)		

Each boiler rebate is eligible for this rebate once. To qualify, this entire application must be completed, including the PSE Gas Boiler Tune-up Worksheet on page 2. Failure to do so will result in the return of your application for completion. Note that the flue gas analysis test strips must be across the load (for instance: low, medium, and high fire) and span enough time to adjust the boiler. Tune-up applications without pre and post combustions analysis test strips, test strips with incomplete or inadequate information, or insufficient time to perform a tune-up will be rejected.

STEP 2: CONTRACTOR INFORMATION

COMPANY		NAME OF CONTRACTOR REPRESENTATIVE		
ADDRESS		CITY	STATE	ZIP
PHONE	FAX	E-MAIL		
Contractor and customer have jointly reviewed findings of the boiler tune-up and all recommendations. Contractor has provided copies of test results (including pre- and post combustion efficiency), and customer is satisfied with the work performed.				
CONTRACTOR SIGNATURE			DATE

GAS BOILER TUNE-UP REBATE APPLICATION
\$600, UP TO THE COST OF THE TUNE-UP
FOR BOILERS 300,000 BTU/HR AND LARGER WITH POWER BURNERS

PSE Gas Boiler Tune-up Worksheet

Tune-up Steps

1. Warm up boiler: Boilers must be at operating temperatures in order to obtain an accurate combustion efficiency reading. If the temp differences between pre and post tests are excessively different, the rebate cannot be paid.
2. Conduct flue gas analysis across the load. Print out test strips for low, medium, and high fire (as applicable) and attach to the left side of the page.
3. Make air/fuel mixture adjustments, clean burners, and other work to be done for the tune-up. Only items related to the tune-up are rebateable. Time between pre and post test strips must reflect enough time for work done or rebate cannot be paid.
4. Conduct flue gas analysis across the load. Print out test strips for low, medium, and high fire (as applicable) and attach to the right side of the page.

Additional Needed Information

1. Power burner manufacturer _____
Model No. _____
2. The boiler is used for _____ % of the heating on this account.
3. How are the boilers sequenced? (if more than one)

4. Boiler is used for _____ % of the domestic hot water heating on this account.
5. If the boiler is not used for heating or domestic hot water, what is it used for?

6. How many boilers perform the same function? _____
Can you estimate the percentage of total account gas usage this boiler is responsible for?
_____ %
7. Was the building constructed 1985 or after? YES NO
8. What type of facility is this?

(Sports Facility; Aquatic Facility; Auditorium; Bank, Church; Supermarket; Hotel; Motel; Hospital; Laboratory with Heavy Fume Hood Use; Laboratory with Light Fume Hood Use; Library; High Rise Office Building; General Office; Dormitory; High Rise Apartment Building; Low Rise Apartment Building; Fast Food Restaurant; Full Service Restaurant; Department Store; Strip Mall; Warehouse; Fire/Police Stations; Museum/Galleries; Medical Clinic; Elementary School; Middle School; High School; College; if other please list it.)

Name of person completing form

If multiple boilers, give boiler ID:

Attach Pre-tune-up test strips here. Flue gas analysis should be taken across the boiler load if possible.

Attach Post-tune-up test strips here. Flue gas analysis should be taken across the boiler load if possible.
