

Overview: New Permanent and Temporary Electric Service Hookup to Existing PSE Power Facilities for Commercial/Industrial and Multifamily Projects

This information applies only if PSE has existing power facilities in your area. If electric power is not readily available, please call:

CUSTOMER CONSTRUCTION SERVICES

1-888-321-7779

Customer Responsibilities:

- Determine if you need overhead or underground service.
- Contact PSE to establish an account, and order your service.
- Obtain an electrical work permit.
- Determine the service rating you want (for example, 200 amp or 400 amp).
- Determine an approved meter location.
- Notify other utilities of your project.
- Call 811, at least two working days before you dig, or via the web (click ITIC at callbeforeyoudig.org).
- Prepare job site by providing a clear path/trench for your service line for proper vault entrance requirements per PSE standards.
- Obtain an approved electrical inspection.
- **After** the electrical inspection has been completed and approved, request PSE to install and energize your system.

Puget Sound Energy's Responsibilities:

- Determine if engineering is required.
- Install your overhead or underground permanent service line conductors.
- Install your meter and energize your system.

Scheduling:

- If engineering is not required, services are typically energized 3 to 5 days after you have passed your inspection.

Service Charge:

- Charges vary due to the type of service you request and the type of system we have in your area. Contact your *CCS Representative* for current rate information.
