

The latest news on what's powering our neighborhoods

You may be eligible for a bill discount

Are you looking for opportunities to reduce your energy bill? Through PSE's Bill Discount Rate program, you can save up to 45% on your monthly bill. Find out instantly and enroll to start saving.

Here's how to find out if you qualify:

- Visit pse.com/discount
- Using the Bill Discount Rate eligibility calculator, enter the number of people in your household, the county you live in and your monthly income.
- Receive instant results, view your eligibility, and enroll to start saving!

A line on the ground could be live — stay away!

As we head into the rainy and stormy winter months, remember to be cautious around any lines on the ground. Power lines can be hidden and look like any other type of line, but can be deadly if you get too close. Assume any line on the ground is energized and stay at least 35 feet away (the length of a school bus). Never drive over or under a downed power line and if you see a line on the ground, call PSE or 911 immediately to report it. Learn more at pse.com/downedlines

Blocked sewer? Call PSE, or ask your plumber to call

If your sewer is blocked beyond the walls of your house, call PSE when your plumber is on their way to clear it. Or have your plumber call. Some natural gas lines have inadvertently been installed through sewer and septic lines. Clearing the pipes with a cutting tool could break the gas line, allowing gas into your house and creating a dangerous situation. PSE will meet your plumber on-site – for free – and ensure the sewer or septic line is safe to clear.

2024 Renewable Energy Report Card

From the renewable energy generated at Puget Sound Energy-owned wind and hydro power facilities as well as what is purchased from independent power producers, we are on track to meet and exceed the required 15 percent renewable energy target by year-end 2024. The target is based on the average amount of electricity PSE customers used the prior two years. The costs associated with the generated renewable energy and renewable energy credits were \$43.17 million per year at the time of acquisition and \$30.93 million for the qualifying renewable resource mix anticipated to be used in 2024.

The below report card is a requirement of Washington State’s Energy Independence Act passed in 2006. PSE is also working towards complying with the Clean Energy Transformation Act (CETA) passed in 2019, which requires us to achieve 100% clean electricity by 2045.

Puget Sound Energy 2024 renewable energy target progress report card

	2022	2023	2024
Target percentage	15%	15%	15%
Approved renewable energy target	3,084,363 MWh	3,198,752 MWh	3,208,438 MWh
Available renewable energy resources	3,794,770 MWh	5,220,760 MWh	5,946,894 MWh
