Puget Sound Energy offers two programs: PSE HELP (Home Energy Lifeline Program) and Weatherization Assistance.

PSE HELP provides funds you can use to pay your energy bills.

Weatherization Assistance Program can provide you with free home upgrades and repairs that will keep your bills low and your home healthy all-year-long.

Eligibility for both programs is based on your income and the number of people that live in your home.

How much HELP can I receive?

HELP offers eligible customers up to \$1,000 in credits per year in payment assistance toward your energy bill. You may apply for HELP annually.

Free home upgrades and repairs

PSE and local agencies work to provide home upgrades and home repairs that protect your home and its interior from external elements including the cold climate. This program is for income-qualified customers who live in a single family, manufactured home or apartment.

Upgrades include: Insulation, roof repairs, duct sealing and much more.

For apartment owners

Apartments qualify for upgrades if the property owner agrees to work with PSE and your local agency on weatherization and insulation. Additional conditions may apply.
