

 **PUGET SOUND ENERGY**

6/6 Integrated Resource Plan Public Webinar

What do you think of the proposed approaches discussed today? Are there other considerations you would like to see included?

Generic resources benefits and burdens

How to deal with the "Split Incentives" problem?

Use of non-energy impacts (NEIs) could alleviate the weighting/prioritizing issue of the current portfolio benefit analysis approach.

Updated Portfolio Benefits Analysis

Need a better way to create metrics rather than "Puget Pulls them out of a hat"

Maximum Customer Benefit Scenario

Impacted Community Benefits vs. General Ratepayer Costs?

This still seems to be assuming that DRIs provide the most benefits to impacted communities. What is PSE doing, quantify benefits and burdens in a way that the DRIs can understand?

Impacted Community Benefits vs. Maximizing GHG Reductions?

How Fast or Slow to implement different measures?

Gas portfolio equity analysis

Need to measure tradeoffs between Electrification vs. Adding Hydrogen to Gas
