

PSE contracting with Osmose Utilities, Inc. for power pole maintenance work

April 2017

As part of Puget Sound Energy's power pole inspection program, crews from Osmose Utilities, Inc.—a service partner of PSE—will conduct routine inspections and testing on more than 20,000 power poles across PSE's service area this year. This maintenance work will help PSE assess the strength of the power poles to ensure continued safety and electric service reliability. In some cases, treatment may be necessary to extend the life of a pole.

Osmose Utilities, Inc. technicians are under contract with PSE and are authorized to perform pole inspection and treatment services. All Osmose technicians will carry photo identification and this PSE letter of authorization. When performing pole inspections, they will drive service vehicles with the Osmose logo on the vehicle doors. For more information about Osmose, please visit osmoseutilities.com.

Thank you for your patience during this routine maintenance work. It's our goal to complete the work as quickly and efficiently as possible, while minimizing disruptions to your neighborhood. If you have questions or concerns, please contact:
