

## Property access notification

### Puget Sound Energy requires access to your property for power pole maintenance work

April 2017

---

Dear PSE Customer,

As part of Puget Sound Energy's power pole inspection program, crews from Osmose Utilities, Inc.—a service partner of PSE—will need safe access to perform routine maintenance on the power pole(s) located on your property. This maintenance work will help PSE assess the strength of the power pole(s) to ensure continued safety and electric service reliability. In some cases, pole treatment may be necessary to extend the life of a pole.

#### What to expect on your property

- This letter serves as your official notification, and an Osmose crew will be back to complete the work on the following date(s): \_\_\_\_\_
- The crew will knock on your door before beginning the work.
  - If you are not present and the pole(s) can be safely accessed without your assistance, the crew will proceed with the work at that time.
  - If you are not present and the crew needs to work with you to gain safe access to the pole(s), a representative from PSE will connect with you to discuss access details.
- The work is expected to take about 30 minutes to complete and should not impact your electric service. It's our goal to leave the work area in the same condition in which we find it.

#### Osmose Utilities, Inc. is an authorized PSE contractor

Osmose Utilities, Inc. technicians are under contract with PSE and are authorized to perform pole inspection and treatment services. All Osmose technicians will carry photo identification and a PSE letter of authorization. When performing pole inspections, they will drive service vehicles with the Osmose logo on the vehicle doors. For more information about Osmose, please visit [osmoseutilities.com](http://osmoseutilities.com).

Thank you for your patience during this routine maintenance work. It's our goal to complete the work as quickly and efficiently as possible, while minimizing disruptions to you and your property. If you have questions or concerns, or if there are specific access requirements on your property, please contact me at the contact information below. You may also visit the project webpage at [pse.com/poleinspection](http://pse.com/poleinspection).

Sincerely,

Robert Trombley
