Puget Sound Energy to upgrade transmission line between Enumclaw and Wilkeson

Dear Resident or Business Owner,

Puget Sound Energy is working to upgrade our electric system in the Enumclaw, Buckley, Burnett and Wilkeson areas to increase reliability of the electric system and to meet growing demand. We have received all the necessary permits to convert our existing low-voltage 55 kilovolt (kV) transmission line to our now current standard of 115 kV at the location shown on the map.

Beginning the week of July 20, PSE's contractor will begin construction of the new 115 kV transmission line. Construction will include converting eight miles of transmission line, which includes replacing aging utility poles, as well as stringing new fiber optic line for PSE communications. Work will start in Wilkeson and move north. When working along roadways, signs and flaggers will direct traffic.

Construction will take place **Mondays through Fridays from approximately 7 a.m. to 7 p.m.** Some select activities, however, may take place at night and on weekends.

The work may cause disruption in your electric service. If the work requires a scheduled power outage, we will provide notice 24-hours in advance of the outage.

Construction along SR 165 is expected to be complete by early September. Construction along SR 410 is expected to start in late August and be complete by mid-October.

If you have any questions or concerns, please call or e-mail me at the number and address below. You may also call toll-free at 1-888-225-5773. Select option 8, then dial extension 81-3937.

Sincerely,

A handwritten signature in black ink, appearing to read 'Bob Parker'.
