## Planned power outage notification

August 9, 2017

---

### Glacier-area electrical system planned power outage

In conjunction with WSDOT's State Route 542 Hedrick Creek culvert replacement project, Puget Sound Energy will be scheduling a planned power outage on Monday, August 28 in order for WSDOT crews to safely set the bridge girders during this portion of their project. Additionally, PSE crews will be using this opportunity to test the Glacier batteries; those within the battery "island" may experience power coming back on and then off again within the first hour of the planned outage. Please see below for more details.

### Scheduled outage details

- **When:** Monday, August 28 between 7:00 a.m. and 7:00 p.m.
- **Duration:** Up to 12 hours
- **Where:** Please see map on back for area affected by the planned power outage

### Tips to prepare for an outage

- Unplug computers, televisions, and sensitive electronics.
- Minimize opening refrigerator and freezer doors during the outage.
- Check to make sure all heat-producing appliances (stoves, toaster ovens, irons, hair curlers) are turned off.
- If electricity is required to run your water or refill your toilet for flushing, have a reserve of water on hand prior to the planned power outage.
- Once the power has been restored for about 10 minutes, turn your equipment back on in stages so that you don't overload the system.

We recognize that being without power is inconvenient and sincerely appreciate your patience and understanding as we work to complete this project as quickly and efficiently as possible.

For more information on the planned outage, please feel free to contact me at the contact information listed below and reference project number **101084536**. For more information on the Hedrick Creek culvert replacement project, please visit the project website:
