

Golden Given natural gas limit station and pipeline

May 9, 2019

OWNER OR CURRENT OCCUPANT
ADDRESS
CITY, STATE ZIP

Dear neighbor,

We're reaching out to inform you of upcoming plans to begin demolition activity related to Puget Sound Energy's Golden Given natural gas limit station and pipeline project.

The Golden Given natural gas project will enable PSE to meet increasing demand for natural gas in the area, and includes construction of a new limit station at 964 99th St. E., and a new section of natural gas pipeline along Golden Given Rd. E. This project will also allow eligible residents along Golden Given Rd. E to access the new pipeline and sign up for natural gas service to their home or business.

What to expect

What: Demolition and removal of the unoccupied house
Where: 964 99th St. E., Tacoma (refer to map on next page)
Who: Demolition crews from our contractor, Wyser Construction
When: One week of work, currently scheduled for late-May Monday through Friday; 7 a.m. through 5 p.m.

Limit stations reduce gas pressure as it moves between systems. This limit station will modify the gas pressure so it can be sent to customers for household use. The majority of equipment will be below ground or housed in two small buildings yet to be constructed.

Construction details

- Demolition activities will include excavation and jack hammering.
- There will be typical construction noise from trucks and heavy machinery. We'll do our best to minimize the time and area impacted.
- All construction activities will be contained within the work site, and we don't anticipate traffic impacts from this phase of work.
- Removal of the building structure, concrete foundation and debris.
- When the work is complete, we'll regrade the area with crushed rock.

Additional construction activities aren't planned to begin until later this year. You'll receive more information about future construction prior to the next phase of the project. We'll also share more information about how to add natural gas service to your home or business if you qualify.

Contact us

We're proud to serve in your community and aim to complete our work with minimal disruption. Please contact me and reference project **#109087541** if you have questions. Thanks for your patience during this important project.
