ADDRESS
CITY, STATE ZIP

We're reaching out to share a project update and inform you of upcoming construction activities for Puget Sound Energy's (PSE's) Golden Given natural gas limit station and pipeline project.

The Golden Given natural gas project will enable PSE to meet increasing demand for natural gas in the area. The project includes construction of a new limit station at 964 99th St. E. and installation of a new section of natural gas pipeline along Golden Given Rd. E.

What: Construction of a new limit station and installation of a new section of natural gas pipeline
Where: 99th St. E. and Golden Given Rd. E., Tacoma (refer to map on next page)
Who: Natural gas crews from PSE and Michels Corporation
When: Approximately four months of work, currently scheduled to begin in late-May through September
Work hours: Monday through Saturday; 7 a.m. through 5:30 p.m.

Limit stations reduce gas pressure as it moves between systems. This limit station will modify the gas pressure so it can be sent to customers for household and business use. The majority of equipment will be below ground or housed in two small aluminum buildings.

What you can expect

- Typical construction noise from excavation, drilling, trucks and heavy machinery
 - Crews will abide by all noise ordinance laws
- Signs and traffic control flaggers will guide vehicles and pedestrians safely through the work zone
 - There will be lane revisions and traffic may be reduced to one lane for certain work
- Temporary driveway closures may be necessary during construction - we'll do our best to coordinate these temporary closures with impacted properties
 - Expect short wait times while crews use steel plates to allow vehicle access
- **PSE customers won't experience an interruption of natural gas service because of this work**
- Temporary patches in the road once crews have completed installation of the gas main. The temporary patches will remain until the final road restoration is complete.

Contact us

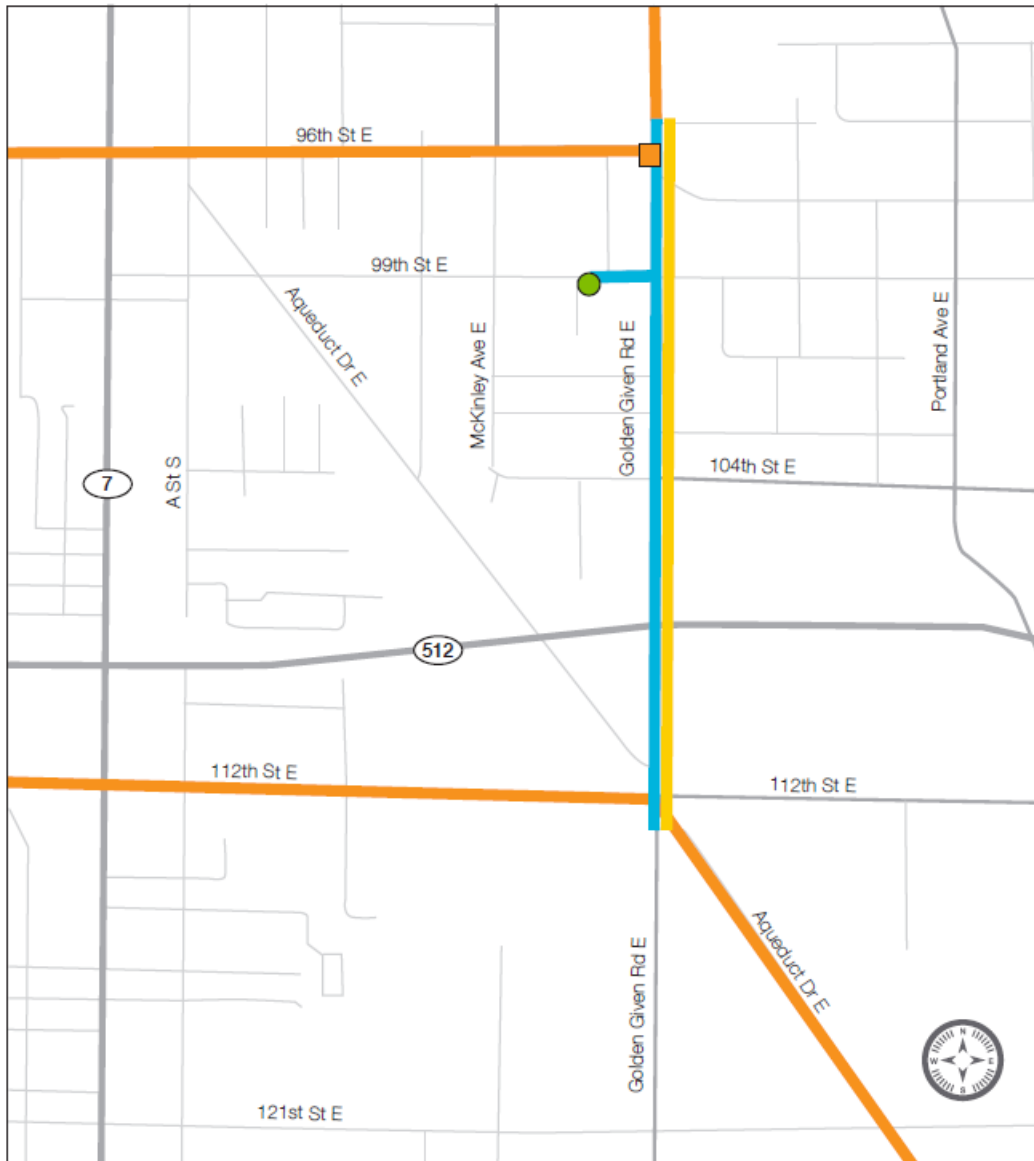

We're proud to serve in your community and aim to complete our work with minimal disruption. Please contact me and reference project **#109087541** if you have questions. Thanks for your patience during this important project.
