

# How We Got to the Recommended Preferred Route

June 2012

- PSE hosted community meetings
- PSE gathered questionnaire results and comments on the three route alternatives

## Stakeholder Advisory Group

- Used community feedback to develop decision criteria to evaluate the route alternatives
- Divided the route alternatives into segments east and west of Interstate 405
- Developed preferred route recommendation using the Multi-Objective Decision Analysis process

Note: A final alignment will be selected after public review, micrositing with property owners and further studies are completed.
