

# Save money with PSE's energy efficiency rebates

## For electric customers:

### Appliances

ENERGY STAR® frontload clothes washer	\$75
ENERGY STAR clothes dryer	\$50
ENERGY STAR frontload clothes washer* (manufactured home and Efficiency Boost)	\$125
ENERGY STAR clothes dryer* (manufactured home and Efficiency Boost)	\$100

### Lighting (instant in-store discount and at PSE Online Marketplace)

Light emitting diode (LED) fixture	Up to \$10
Patio style LED string lights	Up to \$3
T8 LED retrofit bulbs	Up to \$4

### Home heating systems

Electric resistance to ductless heat pump conversion (single family homes)	\$800
Electric forced-air furnace to air source heat pump conversion (single family homes)	\$1,500
Electric resistance to ductless heat pump conversion* (manufactured home and Efficiency Boost)	\$2,400
Electric forced-air furnace to air source heat pump* conversion (manufactured home and Efficiency Boost)	\$2,400

### Water heating systems

Hybrid heat pump water heater Tier 3 (instant in-store discount)	\$500
Hybrid heat pump water heater Tier 3* (manufactured home and Efficiency Boost)	\$200

## For natural gas customers:

### Home heating systems

ENERGY STAR or AHRI Certified natural gas boiler (95 percent AFUE, single family homes)	\$700
ENERGY STAR or AHRI Certified natural gas forced-air furnace (95 percent AFUE, single family homes)	\$700
ENERGY STAR or AHRI Certified natural gas boiler* (95 percent AFUE, manufactured home and Efficiency Boost)	\$1,000
ENERGY STAR or AHRI Certified natural gas furnace* (95 percent AFUE, manufactured home and Efficiency Boost)	\$1,400
Integrated space and water heating: ENERGY STAR or AHRI Certified natural gas tankless water heater or an ENERGY STAR or AHRI Certified natural gas boiler (95 percent AFUE, single family homes)	\$800

### Water heating systems

ENERGY STAR natural gas storage water heater (single family homes)	\$50
ENERGY STAR natural gas tankless water heater (single family homes)	\$250
ENERGY STAR natural gas storage water heater* (manufactured home and Efficiency Boost)	\$100
ENERGY STAR natural gas tankless water heater* (manufactured home and Efficiency Boost)	\$600

## For electric and/or natural gas customers:

### Energy management

ENERGY STAR smart thermostat	\$75 limit: 1 per household
Line voltage connected thermostat (PSE approved models)	\$75 maximum of 5 per household
ENERGY STAR smart thermostat Efficiency Boost*	\$175 limit: 1 per household
Line voltage connected thermostat Efficiency Boost* (PSE approved models)	\$130 maximum of 5 per household

### Weatherization (for single family homes)\*\*

Windows (single-pane to U30 replacement)	\$50 per window, up to \$750
Windows* (Efficiency Boost single-pane to U30 replacement)	\$200 per window, up to \$2,000
Windows (single- or double-pane to U22 replacement)	\$100 per window, up to \$1,500
Windows* (Efficiency Boost single- or double-pane to U22 replacement)	\$200 per window, up to \$2,000
Attic insulation (R11 or less to R49)	\$0.50 per sq ft
Attic insulation* (Efficiency Boost R0 to R49)	\$1.50 per sq ft
Attic insulation* (Efficiency Boost R11 to R49)	\$1.30 per sq ft
Wall insulation (R0 to R13)	\$0.75 per sq ft
Wall insulation* (Efficiency Boost)	\$1.60 per sq ft
Floor insulation (R11 or less to R30)	\$0.25 per sq ft
Floor insulation* (Efficiency Boost)	\$1.45 per sq ft
Prescriptive air sealing (attic and/or floor)	\$0.10 per sq ft
Prescriptive air sealing* (Efficiency Boost)	\$0.20 per sq ft

Prescriptive duct sealing and insulation (R0 to R11)	up to \$400
Prescriptive duct sealing and insulation* (Efficiency Boost)	up to \$900
Advanced duct sealing	up to \$1,250
Standard duct sealing only	up to \$300
Standard duct sealing only* (Efficiency Boost)	up to \$500
ENERGY STAR whole house ventilation	\$50 per home

### Weatherization (for manufactured/mobile homes)

Attic Insulation	\$1.30 per sq ft
Floor insulation	\$1.30 per sq ft
Prescriptive duct sealing	up to \$450
Windows	\$200 per window, up to \$2,000
ENERGY STAR whole house ventilation	\$50 per home

You must be a current PSE single family residential and/or natural gas electric customer. Single-family new construction, multifamily (5 or more attached units) and commercial accounts are not eligible. Qualifying products must be installed in PSE's service area. Weatherization work must be completed by a pre-authorized PSE Trade Ally. All are tariffed services and subject to change or termination without prior notice. Additional qualifications apply.

For a complete list of qualifications, visit [pse.com/rebates](http://pse.com/rebates) or call a PSE Energy Advisor at 1-800-562-1482, Monday through Friday, 8 a.m. to 5 p.m. or email at [energy.advisor@pse.com](mailto:energy.advisor@pse.com). Check out the PSE Marketplace at [pse.com/marketplace](http://pse.com/marketplace) to learn more about instant rebates on select energy-efficient products for qualified customers.

\* Income-qualified customers may be eligible for increased Efficiency Boost rebates. Contact a PSE Energy Advisor at 1-800-562-1482 or [energy.advisor@pse.com](mailto:energy.advisor@pse.com), or visit [pse.com/boost](http://pse.com/boost), to learn more.

\*\* Bundle 3 rebates in one project \$350. Bundle 4 rebates in one project \$500.

## Heating

- Set the thermostat to 68°F or lower when you're at home and awake, and lower 7°F to 10°F when you're asleep or away. Install and properly set a programmable thermostat to make this happen automatically.
- If you have baseboard heaters, turn the thermostat down or off in unoccupied rooms and close the door. Do not do this if you have a furnace or heat pump.
- Have your heating system inspected regularly by a professional to ensure it's operating safely and efficiently.
- Clean or replace your furnace or heat pump filters regularly throughout the heating season. Proper air flow is important to the performance of your heating system. Replace filters as needed.
- Keep areas in front of baseboard and wall heaters, room registers and return air grills clean and clear of furnishings, curtains or other objects that block air flow.

## Lighting

- Replace incandescent lighting with ENERGY STAR® qualified LED bulbs and fixtures, particularly in areas you use most. LED bulbs use up to 80 percent less energy than incandescent bulbs while providing the same amount of light.
- LED bulbs last anywhere from 13-25 years longer than incandescent bulbs, making them the ideal choice for hard-to-reach sockets and outdoor lighting.
- Choose the right bulb for each room. LED bulbs come in a variety of shapes, sizes and color tones to suit nearly every household fixture.
- Today's ENERGY STAR qualified bulbs turn on immediately and do not flicker or buzz. LEDs also offer dimmable options.
- When they do finally burn out, properly recycle CFL and other bulbs for free at participating retail locations or household hazardous waste facilities.

## Water heating

- Set the water heater thermostat to 120°F or the "low" setting.
- Find and fix leaks in fixtures and pipes. If your water heater is leaking, replace it.
- Install inexpensive pipe insulation on all exposed hot water pipes and on the first three feet of exposed cold water pipe that is connected to the water heater.
- Wash clothes in cold water and take shorter showers.
- Use the dishwasher rather than hand-washing dishes and don't pre-rinse dishes.
- Install low-flow, high-performance showerheads and faucet aerators.
- Install ShowerStart thermostatic shut-off valves to save even more water and energy.

Get additional tips, rebate forms, contractor referrals and more info at [pse.com/rebates](http://pse.com/rebates) or call a PSE Energy Advisor at 1-800-562-1482, Monday through Friday 8 a.m. to 5 p.m. or email at [energy.advisor@pse.com](mailto:energy.advisor@pse.com).

## Typical home energy use:

## Weatherization

- Use inexpensive weather stripping and door sweeps to reduce air leaks around entry doors. For a no-cost fix, roll up a bath towel and hold it against the bottom of the door with a weight.
- Fill, patch or caulk holes in floors and ceilings connected to unheated spaces. Often, large holes can be found in closets. Weather strip or temporarily seal access doors or hatches leading to unheated upper floors or attics.
- Check that your floors, walls, duct system and attic/ceiling are properly insulated.

## Appliances and electronics

- Avoid over drying laundry and clean the lint filter every time you use it to decrease drying time.
- Think about whether you need that second fridge or freezer in the garage or basement. Older units can cost more than \$200 a year to power.
- When cooking, match pots and pans to the right sized burner. Use a microwave oven, rather than your stove, to heat food whenever possible.
- Many electronics draw power even when turned off. Plug items like TVs, DVD players and game consoles into power strips that you can switch off when not in use. Special advanced power strips do this automatically.
