

# Telecommunications Efficiency Program

## Earn incentives to optimize your energy usage

The Telecommunications Efficiency Program (TEP) helps customers with medium and large telecommunications facilities identify and implement energy-efficiency improvements that lower your energy usage and energy bill. You'll also earn valuable kilowatt-hour (kWh) incentives to help recover improvement costs.

### What you get

Customers who qualify for TEP may receive the following:

- Hands-on guidance throughout the energy-efficiency process, including a no-cost facility audit and identification of low- and no-cost energy-saving measures.
- An action plan report that details a holistic review of your facility's energy usage and loads, including HVAC, controls systems, mission-critical loads, uninterruptible power supply and other facility systems.
- Recommendations for capital energy projects, should you decide to invest in future energy-efficiency upgrades.
- Incentives based on verified kilowatt-hours saved. Current incentive rates are listed below.

Incentive type	Details	Maximum
Capital projects	\$0.45 per kWh saved	Total incentive can cover up to 70% of eligible project costs
Low- and no-cost measures	\$0.05 per kWh saved	

Use the QR code below for more details about our TEP incentives.

### How you qualify

To be eligible for TEP incentives:

- Your facility must be within PSE's electric service area and you must be a current PSE electric customer.
- Your facility must operate as a telecommunications company with the majority of your electric load associated with cellular, fiber optics and/or internet services.
- Facilities whose principal location is for office or retail use usually do not qualify for this program.
- Your facility must be pre-approved by PSE prior to the installation of all energy-efficiency improvement measures.
- Use the QR code below to read additional requirements.

### How you apply

Use the QR code below for instructions on how to apply.
