

# Industrial System Optimization Program

## Earn incentives for optimizing industrial systems

Our Industrial System Optimization Program (ISOP) provides industrial customers with the engineering support you need to tune up and optimize systems in your facility for better energy performance. After you implement identified energy-saving action items, you'll earn an incentive that can cover up to 100% of eligible project costs.

## What you get

If you qualify for ISOP, you'll receive:

- An energy audit done in two separate events: an initial scoping meeting and a site deep-dive.
- A list of low- and no-cost action items, as well as estimates of the annual cost and energy savings associated with each item.
- Guidance from a PSE engineer to help you implement the low- and no-cost action items.
- A performance incentive based on energy savings. The incentive can cover up to 100% of eligible project costs, and current incentive rates are listed below.

Incentive type	Details	Maximum
Performance incentive	\$0.07 per kWh saved \$1 per therm saved	Up to 100% of eligible project costs
ISOP+ incentive* *See website for details	\$0.35 per kWh saved \$5.50 per therm saved	Up to 100% of eligible project costs

Use the QR code below for more details about our ISOP incentives.

## How you qualify

To be eligible for ISOP:

- Your business site must be within PSE's service area and use electricity and/or natural gas from PSE.
- Your business site must be considered industrial, which often (but not always) means either: the majority of its electric load is associated with processing or manufacturing; or, its subsystems maintain long run-hours, rely on industry-standard technology, and keep relatively stable control set points and loads.
- Sites whose principal use is office or retail are almost always not eligible for this program.
- Buildings targeted in your ISOP portfolio must collectively use greater than 1,000,000 kWh or 50,000 therms (or a combination of both) annually.

## How you apply

Use the QR code below for instructions on how to apply. If you have questions, get in touch with us at [industrialem@pse.com](mailto:industrialem@pse.com).

Energy-efficiency programs like our Industrial System Optimization Program support PSE's vision to reduce carbon emissions and create a cleaner energy future for all. Learn more at [pse.com/TOGETHER](https://pse.com/TOGETHER).
