

Monitoring Based Commissioning

Use data to maximize building efficiency

Our Monitoring Based Commissioning (MBCx) program takes commissioning to the next level by using software to collect, analyze and report data to optimize energy efficiency. MBCx is not just about technology. It's a continuous process of monitoring, analyzing and improving building operations collaboratively with your chosen commissioning professional. Utilize this program as a stand-alone opportunity, or you may combine it with our other commissioning programs to increase energy savings and incentives.

What you get

Implementation incentive	Details*	Maximum
Upon completion of project implementation with all required training and documentation provided	Up to \$0.15 per sq. ft.	75% of commissioning professional's fee
First-year performance incentive	Details	Maximum
After one year of efficient operation, with energy savings exceeding 6%, following the implementation incentive	\$0.05 per kWh saved \$0.80 per therm saved	Applies to both performance incentives combined, up to 100% of eligible project costs (most projects receive total incentives covering 60%–70% of eligible project costs)
Second-year performance incentive	Details	
After two years of efficient operation, with energy savings exceeding 6%, following the implementation incentive	\$0.05 per kWh saved \$0.80 per therm saved	

*Incentive rates are determined by your PSE customer type. Use the QR code below to learn more about our MBCx incentives.

How you qualify and apply

To learn how you qualify and apply for our MBCx program, use the QR code below. If you have questions, get in touch with us at commissioning@pse.com.

Energy-efficiency programs like Monitoring Based Commissioning support PSE's vision to reduce carbon emissions and create a cleaner energy future for all. Learn more at pse.com/TOGETHER.
