

Building Tune-Up

Simplified commissioning for greater efficiency

Our Building Tune-Up program is a simplified option for building owners who want to implement low- and no-cost energy-efficiency opportunities without the full commissioning process. The program helps you analyze your building's energy consumption, leverage your building operator's expertise to implement efficiency measures, and earn incentives.

What you get

Implementation incentive	Details*	Maximum
Upon completion of project implementation with all required training and documentation provided	Up to \$5,000	75% of commissioning professional's fee
Performance incentive	Details	Maximum
After one year of efficient operation, with energy savings exceeding 6%, following the implementation incentive	\$0.05 per kWh saved \$0.80 per therm saved	100% of eligible project costs (most projects receive total incentives covering 60%–70% of eligible project costs)

Implement monitor-based commissioning measures (more at pse.com/mbcx) to supplement the implementation incentive and add a second-year performance incentive at rates listed above.

*Incentive rates are determined by your PSE customer type. Use the QR code below to learn more about our Building Tune-Up incentives.

How you qualify and apply

To learn how you qualify and apply for our Building Tune-Up program, use the QR code below. If you have questions, get in touch with us at commissioning@pse.com.

Energy-efficiency programs like Building Tune-Up support PSE's vision to reduce carbon emissions and create a cleaner energy future for all. Learn more at pse.com/TOGETHER.
