

Existing Building Commissioning

Find the ideal strategy to maximize performance

Our Existing Building Commissioning (EBCx) program offers training and incentives to help you maximize energy-saving potential within your building’s existing systems. With no major capital expense, the program can help you achieve as much as 15% energy savings or greater. Plus, our incentives can cover a majority of your implementation costs.

What you get

Assessment incentive	Details*	Maximum
Upon completion of the building assessment and delivery of the report to PSE	Up to \$5,000	100% of commissioning professional's fee
Implementation incentive	Details*	Maximum
Upon completion of project implementation with all required training and documentation provided	Up to \$0.35 per sq. ft.	75% of commissioning professional's fee
Performance incentive	Details	Maximum
After one year of efficient operation, with energy savings exceeding 6%, following the implementation incentive	\$0.10 per kWh saved \$2.00 per therm saved	100% of eligible project costs (most projects receive total incentives covering 60%–70% of eligible project costs)

Implement monitoring-based commissioning measures (more at [PSE.com/mbcx](https://www.pse.com/mbcx)) for a second-year performance incentive at rates listed above.

*Incentive rates are determined by your PSE customer type. Use the QR code below to learn more about our EBCx incentives.

How you qualify and apply

To learn how you qualify and apply for our EBCx program, use the QR code below. If you have questions, get in touch with us at Commissioning@PSE.com.

Energy-efficiency programs like Existing Building Commissioning support PSE’s vision to reduce carbon emissions and create a cleaner energy future for all. Learn more at [PSE.com/PoweringGenerations](https://www.pse.com/poweringgenerations).
