MAJOR HVAC CONTROLS UPGRADE INCENTIVES

FOR PSE COMMERCIAL CUSTOMERS

PSE increases incentive up to 50% to reward high savings!

INCENTIVE OF UP TO 50% OF TOTAL PROJECT COST:

Incentives are provided in 2 phases:

- base incentive - paid at the end of the installation
- performance incentive - paid after almost a full year of actual operation

Maximum incentive level varies depending on the services provided by PSE. The base incentive is calculated assuming a minimum 5% whole building savings. The performance incentive is calculated based on whole building savings. See the table below for details.

WHAT IS A MAJOR HVAC CONTROLS UPGRADE?

Major HVAC controls upgrades involve adding and/or modifying 3 or more significant energy saving control sequences as well as other upgrades such as new controllers and a web-based user interface.

PSE requirements assure proper operation with significant and continued savings!

WHAT ARE REQUIREMENTS?

To help assure owners the HVAC controls work to produce significant savings over time, PSE has specific project requirements in the following areas. Details are available by contacting PSE and on the PSE website.

- energy efficient control sequences that go beyond code
- testing to verify proper operation and efficiency
- features to help maintain efficiency over time
- operator training and facility guide

HOW TO APPLY: Send a completed Custom Retrofit application and the Requirements Checklist along with your project scope/cost. Application and checklist are on line (pse.com/mybusiness) under Retrofit Grants.

FOR MORE INFORMATION: Call a PSE Energy Advisor at 1-800-562-1482 or visit the PSE website (pse.com/mybusiness) under Retrofit grants.

HVAC Controls Upgrade Incentive

Incentive Description	PSE Electric Service (includes combined Electric & Natural Gas Service)	PSE Natural Gas Service Only
Maximum Total Incentive (Base + Performance)	50% of total project cost	25% of total project cost
Base Incentive (Based on 5% whole building savings*)	$.40/kWh saved + $6/therm saved	$6/therm saved
Maximum Base Incentive	35% of total project cost	15% of total project cost
Performance Incentive (Based on 1st year whole building savings*)	Based on whole building savings (≥ 6%)	$6/therm saved

* Whole building energy use may exclude large non-HVAC uncontrollable/process loads like data centers

WHOLE BUILDING METERING: PSE or other building level metering is required. If there is none, the customer is eligible for an incentive of up to $3,000 for sub-metering to determine the actual building energy use. The meter must be installed several months before the project starts.
