

IMPORTANT NOTICE FOR PUGET SOUND ENERGY CUSTOMERS ABOUT PROPOSED CHANGES IN RATES

Puget Sound Energy (PSE) recently filed requests with the state Utilities and Transportation Commission (UTC) to adjust electric rates. The requested changes, proposed to be effective on January 1, 2020, include:

Federal Wind Power Credit (Electric Schedule 95A Federal Incentive Tracker): An annual true-up of the pass-through of federal income tax benefits from PSE's investments in the utility-owned and operated Wild Horse and Lower Snake River wind facilities, and Washington-based manufacturing. This filing proposes to decrease the credit for residential customers, which will increase electric rates for residential and some lighting customers. Other customers would see a decrease. Overall, this filing proposes a 0.04 percent rate decrease.

Renewable Energy Credit: (Electric Schedule 137 Temporary Customer Charge or Credit): An annual true-up of the pass-through of Renewable Energy Credit (REC) revenue and the net proceeds related to biogas. This filing proposes to increase the credit, which will decrease electric rates for all customers. Overall, this filing proposes a 0.01 percent rate decrease.

Effects on residential customers

The combined monthly bill effect of the two proposed rate changes for the typical residential electric customer is shown in this chart. Individual customers will see a greater or lesser increase than what is shown, depending on the amount of usage. Most electric customers are billed monthly. Some electric customers are billed every other month.

Energy – First 600 kWh	\$50.65	\$50.65
Energy – Over 600 kWh	\$31.01	\$31.03
Total Bill at 900 kWh per month	\$89.15	\$89.17
