**SAFETY NOTICE:
SEWER INSPECTION REQUESTED**

IMPORTANT SAFETY NOTICE: SCHEDULE SEWER/SEPTIC LINE INSPECTION

Puget Sound Energy has identified your address as potentially having a natural gas cross bore. **This is not a sales message. No products or services are being offered.**

A cross bore occurs when a natural gas line intersects with a sewer or septic pipe. This becomes a safety risk if a cutting tool is used to clear a clogged sewer or septic line and accidentally damages the natural gas line, allowing natural gas into your home or nearby homes.

Having your sewer or septic line inspected by Hydromax USA is free and any required repairs will be completed at no cost to you.

To schedule this free safety inspection:

Call **206-512-8032** - Hydromax USA call center
Monday through Friday, 6 a.m. to 6 p.m.

Online **PSE.com/SewerSafety** to self-schedule
