improving your **NATURAL GAS SERVICE** ▶▶▶

Improving natural gas service for our customers

Tolt 16-inch natural gas line project

In 2015, PSE began work to improve the reliability of the natural gas system by installing roughly 12,000 feet of 16-inch natural gas pipeline along the Seattle Public Utilities (SPU) Tolt pipeline corridor between 155th Ave NE and Avondale Rd NE. Due to subsurface obstruction under Cottage Lake Creek, we were unable to drill the last 1,800 feet underground.

In June 2018, PSE will continue construction of this new, 16-inch natural gas pipeline between Avondale Rd NE and Mink Rd NE. For the safety of our customers and crews, this work will require a temporary closure of the Tolt Pipeline Trail between 400 feet west of Avondale Rd NE and Mink Rd NE for the installation of a new pedestrian and equestrian bridge between June and September.

What you can expect:

What: Work entails installation of approximately 1,800 feet of 16-inch natural gas pipeline and construction of a new bridge over Cottage Lake Creek.

Where: SPU Tolt Pipeline corridor between 400 feet west of Avondale Rd NE and Mink Rd NE. **This segment of the Tolt trail will be closed to the public from June through September.**

When: June through November 2018.

Construction

We will work diligently to minimize impacts to neighbors, the environment and trail access during construction.

- The Tolt Pipeline Trail will be closed along the project route, including during off-construction hours.
- Bridge construction will take place between June and September to minimize impacts to Cottage Lake Creek fish.

Safety

Safety is our top priority when it comes to designing, constructing, operating and maintaining a natural gas system that serves more than 27,000 PSE customers in Woodinville, Bothell, Kenmore, Kirkland and unincorporated King County. We are committed to listening to our customers, maintaining an informed and open conversation about our work, and being responsive to customer needs. Learn more about natural gas safety at pse.com/safety.
