

Tolt 16-inch natural gas line **PROJECT UPDATE**

February 21, 2017

Dear Customer,

This summer, crews from Puget Sound Energy (PSE) and our contractor will begin work to improve the reliability of the natural gas system in your area by installing roughly 1,800 feet of 16-inch natural gas pipeline along the Seattle Public Utilities (SPU) Tolt pipeline corridor between Avondale Road NE and Mink Road NE. Construction is expected to begin in July.

You may have received a mailed notice from King County's Department of Permitting and Environmental Review providing additional information about the environmental review and permit application for this project.

If you have any questions about the project, please reach out to us at the email address or phone number listed below.

Stay tuned for additional information

We will keep the community informed as we work towards completing this project which is necessary to provide our customers with dependable natural gas service in the future. Before work starts this summer, we'll send an additional mailed notification to share more details about work hours and what to expect during construction.

We understand that living near construction can involve impacts, and we thank you for your patience.

Sincerely,

Patima Dejarath
Project Manager

Jackson Taylor
Community Projects Manager
