Puget Sound Energy's Solar Choice program is sold in blocks of 150 kilowatt-hours (kWh). This table provides the renewable resource mix projected in 2018.

Green-e Energy Certified New² Renewables in PSE Solar Choice

2017 – Historical¹

2018 – Prospective¹

1. The Prospective figures reflect the renewables that we have contracted to provide. Actual figures may vary according to resource availability. We will annually report to you before August 1 of next year in the form of a Historic Product Content Label the actual resource mix of the electricity you purchased. Historic figures reflect the power delivered to the Solar Choice Program's customers in 2017.

2. New Renewables come from generation facilities that first began commercial operation within the past 15 years.

For comparison, the current average mix of resources supplying PSE includes: Coal (37%), Hydroelectric (31%), Natural Gas (22%), Wind (9%), Nuclear (<1%), Other* (<1%). *Biomass, Landfill Gas, Petroleum and Waste. Source: Estimated 2016 electricity fuel mix, pending final 2016 report from the Washington Department of Commerce.

The average home in the United States uses 897 kWh per month. [Source: U.S. EIA, 2017]. The average PSE home uses 1000 kWh per month.

For specific information about this electricity product refer to the Frequently Asked Questions page, visit pse.com/renewables, contact a PSE Energy Advisor at 1-800-562-1482, Monday through Friday 8 a.m. to 5 p.m. or email psegreenpower@pse.com.

The PSE Solar Choice Program is Green-e Energy certified, and meets the environmental and consumer-protection standards set forth by the nonprofit Center for Resource Solutions. Learn more at www.green-e.org.
