1. The Prospective figures reflect the renewables that we have contracted to provide. Actual figures may vary according to resource availability. We will annually report to you before August 1 of next year in the form of a Historic Product Content Label the actual resource mix of the electricity you purchased. Historic figures reflect the power delivered to the PSE Green Power Program’s customers in 2018.

2. New Renewables come from generation facilities that first began commercial operation within the past 15 years. This product includes generation from a facility that is approved under a strict set of criteria as repowered.

3. Eligible hydroelectric facilities are defined in the Green-e Energy National Standard (www.green-e.org/getcert_re_stan.shtml) and include facilities certified by the Low Impact Hydropower Institute (LIHI) (www.lowimpacthydro.org); and facilities comprised of a turbine in a pipeline or a turbine in an irrigation canal.

For comparison, the current average mix of resources supplying PSE includes: Coal (38%), Hydroelectric (33%), Natural Gas (21%), Wind (6%), Nuclear (<1%), Other* (<1%). *Biomass, non-biogenic Petroleum. Source: Published by the Washington Department of Commerce, October 2018, with data reported by PSE in August 2018.

The average home in the United States uses 867 kWh per month. [Source: U.S. EIA, 2018]. The average PSE home uses 1000 kWh per month (based on 2017 data).

For specific information about this electricity product refer to the Frequently Asked Questions page, visit pse.com/greenpower, contact a PSE Energy Advisor at 1-800-562-1482, Monday through Friday 8 a.m. to 5 p.m. or email psegreenpower@pse.com.

The PSE Green Power Program is Green-e Energy certified, and meets the environmental and consumer-protection standards set forth by the nonprofit Center for Resource Solutions. Learn more at www.green-e.org.
