

PRODUCT CONTENT LABEL

Puget Sound Energy's Green Power Program is sold in blocks of 200 kilowatt-hours (kWh) or matches 100% of your electricity usage. These charts provide the renewable resource mix in the PSE Green Power Program in 2021, as well as the projected resource mix in 2022.

Green-e® Energy Certified New² Renewables in the PSE Green Power Program

1. The Prospective figures reflect the renewables that we have contracted to provide. Actual figures may vary according to resource availability. We will annually report to you before August 1 of next year in the form of a Historic Product Content Label the actual resource mix of the electricity you purchased. Historic figures reflect the power delivered to the PSE Green Power Program's customers in 2021.

2. New Renewables come from generation facilities that first began commercial operation within the past 15 years. This product includes generation from a facility that is approved under a strict set of criteria as repowered.

For comparison, the current average mix of resources supplying PSE includes: Coal (36%), Hydroelectric (32%), Natural Gas (20%), Wind (10%), Nuclear (<1%), Other* (<1%). *Biomass, Geothermal, non-biogenic Petroleum. Source: Published by the Washington Department of Commerce, October 2020, with data reported by PSE in August 2020.

The average home in the United States uses 893 kWh per month. [Source: U.S. EIA, 2020]. The average PSE residential customer uses 882 kWh per month (based on 2020 data).

For specific information about this electricity product refer to the Frequently Asked Questions page, visit pse.com/greenpower, contact a PSE Energy Advisor at 1-800-562-1482, Monday through Friday 8 a.m. to 5 p.m. or email psegreenpower@pse.com.

The PSE Green Power Program is Green-e® Energy certified, and meets the environmental and consumer-protection standards set forth by the nonprofit Center for Resource Solutions. Learn more at www.green-e.org.
