

**PRODUCT CONTENT LABEL**

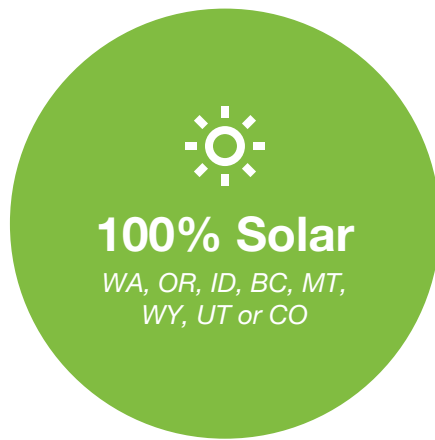

Puget Sound Energy's Solar Choice program is sold in blocks of 150 kilowatt-hours (kWh). The charts below provide the renewable resource mix in Solar Choice in 2021, as well as the projected resource mix in 2022.

**Green-e® Energy Certified New<sup>2</sup> Renewables in the PSE Solar Choice Program**

**2021 - Historical<sup>1</sup>**

**2022 – Prospective<sup>1</sup>**

1. The Prospective figures reflect the renewables that we have contracted to provide. Actual figures may vary according to resource availability. We will annually report to you before August 1 of next year in the form of a Historic Product Content Label the actual resource mix of the electricity you purchased. Historic figures reflect the power delivered to the Solar Choice Program's customers in 2021.

2. New Renewables come from generation facilities that first began commercial operation within the past 15 years.

For comparison, the current average mix of resources supplying PSE includes: Coal (36%), Hydroelectric (32%), Natural Gas (20%), Wind (10%), Nuclear (<1%), Other\* (<1%). \*Biomass, Geothermal, non-biogenic Petroleum. Source: Published by the Washington Department of Commerce, October 2020, with data reported by PSE in August 2020.

The average home in the United States uses 893 kWh per month. [Source: U.S. EIA, 2020]. The average PSE residential customer uses 882 kWh per month (based on 2020 data).

For specific information about this electricity product refer to the Frequently Asked Questions page, visit [pse.com/renewables](https://pse.com/renewables), contact a PSE Energy Advisor at 1-800-562-1482, Monday through Friday 8 a.m. to 5 p.m. or email [psegreenpower@pse.com](mailto:psegreenpower@pse.com).

The PSE Solar Choice Program is Green-e® Energy certified, and meets the environmental and consumer-protection standards set forth by the nonprofit Center for Resource Solutions. Learn more at [www.green-e.org](http://www.green-e.org).
