The latest news on what's powering our neighborhoods

DON'T RISK IT!

Natural gas and electric utility lines could be buried where you least expect them. Hitting an underground utility could result in a big repair bill, not to mention putting you at risk of injury. Utility-owned lines are located for free.

Always contact 811 before digging to avoid service disruptions caused by damaging buried utilities.

A cleaner energy future belongs to all of us. Working TOGETHER we can make that happen.

We've proudly provided energy to communities in the Pacific Northwest for 150 years. Our focus every day is providing safe and reliable energy for your homes and businesses. As we work towards our aspirational goal of beyond net zero carbon energy by 2045, we'll continue to invest in our communities by partnering on community-based clean energy solutions, more local renewable resources, support for electric vehicles, modernizing our electric grid, expanding energy efficiency options, bill assistance programs and helping others in our region meet their clean energy goals.

Creating a sustainable future with renewable energy programs

Do you want to reduce your environmental impact and be part of a cleaner energy future? We offer a variety of flexible renewable energy programs to fit your budget and sustainability goals.

Green Power and Solar Choice: Match your home's energy use with Pacific Northwest generated renewable energy like wind and solar. Your participation supports the Green Power Solar Grant program that provides solar installations for local community organizations.

Carbon Balance: Reduce the impact of your natural gas use, and your carbon footprint, by supporting local forestry projects that remove carbon from the atmosphere.

Community Solar: Replace the electricity you use with 100% locally generated solar power without having to install a system of your own.

Renewable Natural Gas (RNG): Replace a portion of your conventional natural gas use with gas captured at a Washington landfill.

In 2022, over 100,000 PSE customers participated in one or more of our renewable energy programs. Together, we are on an important journey to reduce our environmental impact and create a more sustainable future. Learn more about our renewable energy programs and sign up at pse.com/renewables.

2022 historic product content labels

Fuel	Historic %	Historic locations
Green Power

April is Safe Digging Month

Call 811 before digging so you don't hurt yourself or damage pipes and wires. Make the call two full business days (not including the day you call) before you dig so utilities can come out and mark the buried lines for free.
