The latest news on what's powering our neighborhoods

## Stay clear of overhead power lines

With summer weather comes home improvement projects that may bring ladders and tools close to overhead power lines. Be sure to look up and around you before you start any work. Keep all objects, including yourself, at least 10 feet from any overhead line. Accidental contact, even near contact, can cause an arc flash that can result in serious injury.

## Find a contractor you can trust

Are you looking for help with your next home project? Our Recommended Energy Professionals (REPs) are pre-screened contractors who can help you with energy-efficient home upgrades, like installing new windows or replacing an old water heater. Our REPs are knowledgeable about energy codes and the most efficient equipment, plus they'll help you get PSE rebates! Get your REP referral online today at [pse.com/rep](https://pse.com/rep).

## Know the signs of a natural gas leak

You can usually detect natural gas from an odor of sulfur or rotten eggs, though it may smell differently to you. There are other tell-tale signs, especially outdoors: bubbles escaping through a puddle, dead vegetation where you wouldn't expect it, and dirt blowing up from the ground. Natural gas rises because it is lighter than air and will rise, and it can be ignited by a spark from something as simple as flipping a light switch. If you detect gas, don't hesitate! Leave the area, then call PSE at **1-888-CALL-PSE**, or call **911**.
